Subject: Caller about Dimock PA

Vicky,

I tried forwarding the original voice mail, but it didn't work. I sent it to Chitra Kumar (OGWDW team lead for hydraulic fracturing) and Ann Codrington (DWPD Division Director) with a short explanation of what we talked about, and that this was probably more of an FYI for them than anything else.

The woman's name is **Ex. 6 - Personal Privacy** She said that she was calling to see if I know anything about their situation and what is being done to correct it. She said they have contaminated water and that the people have been without water for years. She said that EPA promised to deliver water and that then EPA backed off on that promise. In her message she said the situation is 'dire'. I have not worked on these issues, so I know little about them. I don't know why she called me.

This is the article I found: http://www.cbsnews.com/8301-505245_162-57356971/pa-chief-to-epa-let-science-be-guide-in-dimock/

Thanks

Ken
